```
Open the file
                      Read the size of the matrix
               Read the number of records to keep(K)
                        Create the gameboard
                                    \Downarrow
                              Read a move
                              Is the game finished? ⇒yes⇒ Display the score
                                 No
                                                                  Close the file
                                 \downarrow \downarrow
                    Record the Move on the record
                           Is the move valid?
                        \Downarrow
                                                 \Downarrow
                   Yes
                                                    No
                                                         \Downarrow
Calculate for the line
                                                  display an error
The move is on, what
Squares should be
Marked
                                                          \downarrow \downarrow
Mark those squares
Remove extra lines from the record ←
Return to look for more moves
```
